

Goliath End of Line Systems Case Erecting—Semi Automatic

Semi automatic flap folder - F-100

Often used as packing table before a case sealer.

After opening the flat case, the operator slides the case into the bottom flap folder. The side flaps are automatically folded and the case held firm during filling.

When the case is full, the operator pushes it to sealing or further transport.

F-100 is pneumatically operated and can be connected directly to SOCO SYSTEM case sealers.

Case is opened

**Front & rear flaps are folded
towards the rail**

**The case is led down on the
rail and pulled back, and the
bottom side flaps are folded**

**The case is held firm and is
ready for filling.**

**For more information or to discuss your specific application call
