Pallet Manager

PalManager Multi **Adjustable for different pallet widths.**

The PalManager Multi is used for stacking of up to 14 pallets or as magazine from where the operator can collect one pallet at a time.

The magazine can be set for automatic operation.

- Safe pallet handling - fewer work-related injuries.
- Increases productivity - always a pallet ready for use.
- Gentle pallet handling.
- No noise or dust inconvenience
- Provides order both in storage and production.

”It has eliminated a lot of lifts, it’s great”

This is a quote from a satisfied user of PalManager at Carlsberg.

The pallet magazine stands in the probably biggest Danish distribution centre for beer and soft drinks in Taastrup. Carlsberg Denmark owns and runs the distribution centre of 35,000 m2 using approximately 10,000 pallets daily.

PalManager stands in the warehouse and is used for stacking of empty pallets in stacks of 10 which are then removed for further use.

The pallet magazine is emptied 3-4 times an hour and this means that, on a working day of 16 hours, approximately 640 pallets are stacked daily which otherwise should have been stacked manually.

The pallet magazine is available in many versions and designs tailored for the individual customer.
